WIGHITA MARKETS

The Receipts of Stock at the Wichite Union Stock Yards for the Past 24 Hours Were: Cattle, 84; Hogs, 697; Shipments: Cattle, 41; Hogs, None.

WICHITA, June 30. The cattle receipts were fair for Monday, with the quality of the offerings up to the general standard, but sellers quoted the market a good 10c, lower than the ruling price last week. Some fair to good shipping steers were offered and found

The hog receipts, while fair for Monday, were far inadequate to meet the demand of the local buyers. The price advanced a good nickel and remained at that figure throughout the day. The quality of offerings was pronounced as inferior to the general average last week. Local packers would have taken 1,500 hogs readily at the advance if they could have found them on the market.

The receipts for packing hogs was far from filling the demand. The thermometer at the west side of the Exchange building registered 99 degrees at 3 o'clock.

There will be a called meeting of the Live Stock company this morning at 9 o'clock by the president, R. T. Bean. County Attorney Morris was at the yards today. He was not exactly looking for stock, but votes, in his race before the

county convention. The following farmers of this county had hogs on the market today, brought in by wagous: K. A. Rogers, L. M. Watts, Dr. Koye, T. A. Hall, O. R. Duratt, C. A.

The top for hogs today was \$3.70. Both packing houses were on the may het today in quest of hogs.

The largest hog weighed today tippe the beam at 490 pounds. The following shippers had stock on the

market: J. B. Kell, Clairmont, hogs, Herman & Herr, Greenwich, hogs. Horton & Farquahanon, Corbin, two

The northern portion of the main floor of the building will be occupied by the agricultural and other food exhibits of foreign pations, which, it is already assured, will be extensive. Great Britian, Germany, France, Mexico. Austria, Denmark, Sweden, Japan. Paraguay, Canada and a number of other countries have already been assand to fifteen thousand square feet ave. each. It is expected that the agricultural exhibits by these countries will be as comprehensive as those of our own country, and will show some features which will be exceedingly instructive to Americans.

Occupying nearly all of the remainder of the main floor will be the exhibit of cereals and other farm products from the states of the union. Every state and territory, it is expected, will be represented by its products. Thus, upon this one vast floor, covering nearly, ten acres, will be displayed in all their variety and perfection the pick of the farm products of the world. It is believed that the exhibit made by this country, naturally exceeding that of any other in extent, will attract great attention, also, by reason of its exceptional merit, and the comprehensive information that will accompany it. This great exhibit, or rather array of

exhibits, will be made and arranged in such a systematic manner that the visitor, almost at a glance, can tell not only the appearance of each object, but what it is, where it came from, and "all about it." For under the regulations adopted for the department, Chief Buchanan requires that each exhibit shall be accompanied with the following data: Name of object, name of producer, where grown, character of soil, date of planting, quantity of seed planted per acre, method of cultivation, date of harvesting, yield per acre, weight, price of product at nearest market, average temperature and rain or snow fall by months between planting and harvesting, and whether or not irrigation was employed.

On the six acres of flooring in the annex, which is virtually an extension of that of the main building, will be shown every description of agricultural machinery, including not only the best and most improved now in use, but also such as will illustrate the progress of the industry, from primitive times to

One of the most novel, instructive and elaborate exhibits, and one that is will undoubtedly attract the attention of every scientific person and scholar interested in any phase of agricultural life, will be that made by the Association of American Agricultural Colleges and Experiment Stations. This exhibit will occupy nearly 8,000 square feet of space, and will be located in the the field of experiment and research in crops, botany, horticulture, entomology, feeding stuffs, animal nutrition, dairy solids, milk testing and veterinary sciences, which is the southwestern like solids and the solid stuffs, animal nutrition, dairy solids, milk testing and veterinary sciences feeding stuffs, and solid solid stuffs, which is the southwestern like the sou ence, and will include an elaborate and

complete botanical, biological and chemical laboratory. In addition to this, the agricultural colleges of the United States will have, in this space, a combined exhibit graph ically illustrating the work and special field covered by each college. This entime exhibit is not only unique, but is something that has never been accomplished or attempted at any previous exposition. The exhibit will be put up and conducted by the directors of the Eagle. different experiment stations and representatives of the different agricultural colleges of the United States, each contributing some part of the exhibit, the whole to be installed in a magnificent manner, at the expense of the United States government.
